

20 BEST SMOOTHIES FOR INSTANT WEIGHTLOSS

BY AMAKA ESTHER

INTRODUCTION

If you are reading this now, it means you are serious and determined to lose weight.

As simple and ordinary as this might sound, I would still say it!! Taking soft drink is unhealthy!!! Very unhealthy!

Soft drinks are the beverage of choice for millions of people, Nigerians inclusive.

It is a well-known knowledge that soft drinks are unhealthy, yet this knowledge has not deterred people from patronizing them probably because it is easily available and affordable.

It is pertinent to know that sugary drinks increase the risk of type 2 diabetes, obesity, storage of fat in the body, heart disease, and other chronic conditions.

It is not enough to point out a problem, an alternative has to be proffered. Hence the introduction of smoothies.

A smoothie is a thick beverage made from blended raw fruit or vegetables with other ingredients as desired by the user.

Unlike fruit juices, smoothies involve blending of whole fruits without addition of preservatives and other additives hence it contains all its nutritional value.

It is also important to note that smoothies also contain fiber from fruits that assist in digestion thus adding to its nutritional content.

Some also include vegetables and spices like ginger for more nutritional value.

If you are serious and determined to lose weight, get ready to do away with soft drinks and embrace smoothies instead!!
